Final Project - ICS3U

Amir Mersad

Jan 22, 2020

Contents

This is my read the docs for the final project icsu 2019-2020

CHAPTER 1

January 06

What I Did Today:

Today I made the first lambda function

January 07

What I Did Today:

Today I created a Github repo and a Cloud9 instance then connected the root of Cloud9 to the repo. Then, I created a index.html file in the root of Cloud9 and updated it to my repo. Finally, I created an Amplify instance and connected it to the Github repo.

CHAPTER 3

January 08

What I Did Today:

Today I got the api gateway to work and give the use information

January 09

What I Did Today:

Today I wrote the html files

CHAPTER 5

January 10

What I Did Today:

Today I created the cognito and got it to work and the sign and sign out work.

January 11

What I Did Today:

Today I wrote the profile page which works

CHAPTER 7

January 12

What I Did Today:

Today I did the javascript and half of css

CHAPTER 8

January 13

What I Did Today:

Today I did wrote tha lambda function to post to dynamodb

January 14

What I Did Today:

Today I did some changes to the files to make them better

CHAPTER 10

January 15

What I Did Today:

Today I made the register file and separate it from the js and added css

January 16

What I Did Today:

Today I started making the update page

CHAPTER 12

January 17

What I Did Today:

Today was the hardest day. I had to change all 3 lambda functions and created 2 pages. I added a page to update the name and last name and created another table on dynamodb and made another page to add and update classes.
